

# Tropical Fruits Powder

Tropical fruits are those fruits that are grown in the tropics (warm climates). Generally, tropical fruits are high in vitamins, minerals, fiber and phytochemicals (non-nutritive but biologically necessary plant chemicals such as beta carotene). Most tropical fruits contain vitamin C and vitamin A, both shown to reduce risk of cancer and heart disease.

Tropical fruits powder produced by Iprona is mainly targeting on those individuals who would like to have all the benefits from these five fruits at once. Variety of your fruits choice is the key factor of adequacy of all sources of nutrients.
